About Me

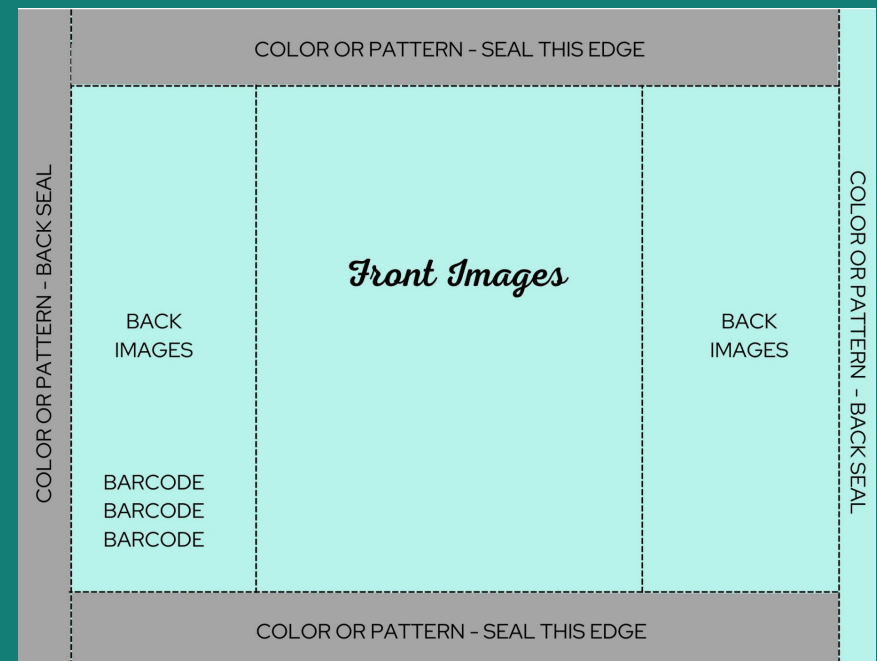

Hi, My name is Lanijah Jones, and I was born and raised in Brooklyn, New York. I want to help people brand and maintain their businesses by creating logos, mockups, and short videos that use pixels and colors to communicate emotions, ideas, and narratives. As a young graphic designer, I am inspired by the belief that design has the power to shape perceptions, provoke thought, and inspire change.

Product Design

As my sister navigates the entrepreneurial path, I bring my design skills to the table, helping her enhance the visual appeal and usability of her products. Whether it's crafting eye-catching packaging or refining the design of her merchandise, I'm there to lend a creative hand.

Logo Designs

I've discovered my happy place in crafting unique logos for the people. There's something incredibly satisfying about translating a person's essence into a visual identity. I'm more than a logo designer; I'm a storyteller through design. It's my way of contributing to people's narratives by leaving a visual imprint of their stories. And in each logo, a piece of my creative soul is intertwined with the essence of those I design for.

Software Used

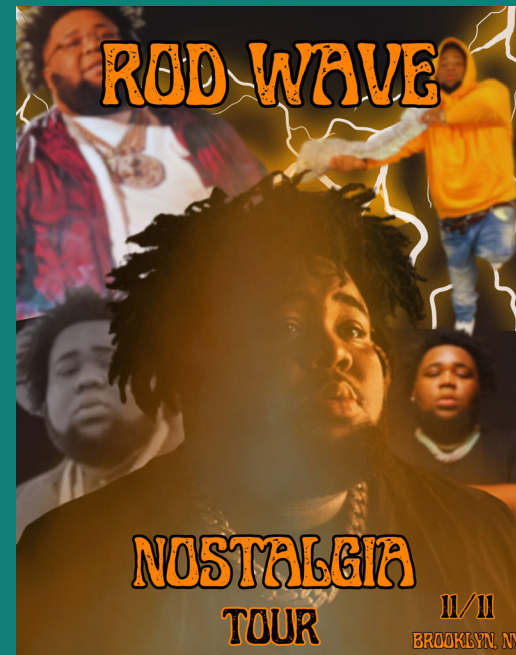

My first logo was created for my sister's new business.

Miscellaneous Work

Ever since I was a kid, I've had this deep love for music. Graphic design, for me, isn't just a way to earn money; it's a platform where I effortlessly combine my two greatest interests. Picture this: a space where every visual I create resonates with the melodies that have always inspired me. My designs go beyond being mere visuals; they're like a symphony, reflecting the urban culture and the beats that truly speak to me.
